Founding Security Engineer | Detection & Response at Ramp

[Save](#)

[Apply](#)

Ramp is building the next generation of finance tools—from corporate cards and expense management, to bill payments and accounting integrations—designed to save businesses time and money with every click. Over 5000 businesses are spending an average of 3.3% less and closing their books 8 times faster, thanks to Ramp's finance automation platform that enables billions of dollars of purchases each year.

Founded in 2019, Ramp has seen nearly 10x year-over-year growth which has led to a valuation of \$8.1 billion in just over 3 years. Its investors include Founders Fund, Stripe, Citi, Goldman Sachs, Coatue Management, D1 Capital Partners, Redpoint Ventures and Thrive Capital, as well as over 100 angel investors who were founders or executives of leading companies. The team is made up of talented leaders from some of the leading financial services and fintech companies—Capital One, Stripe, Affirm, Goldman Sachs, American Express, Visa—as well as high-growth technology companies like Facebook, Spotify, Zendesk, Uber, Dropbox, and Instacart. About the Role

Join our growing security team in a foundational role focused on defining and executing our vision for threat detection and incident response capabilities at Ramp. You will have direct impact building, optimizing, automating, and growing security capabilities to minimize adverse events and protect our brand. This role will also serve as a security partner to Ramp Risk and Financial Engineering on active project areas such as fraud detection and defenses.

What You'll Do

- Define and execute strategy for threat detection and incident response to ensure safety within our network, corporate services, and platform applications
- Coordinate and drive resolution on a diverse range of incidents as part of an on-call team
- Lead threat modeling exercises, developing and implementing remediation and improvement plans
- Build and deploy automation to cover core capabilities, and write detections to fit our use cases beyond built-in SIEM rules
- Become the directly responsible individual for existing SecOps augmentation services and relevant security tooling

What You Need

- Minimum 5 years of hands-on technical experience in security engineering, systems engineering, software engineering, or network engineering
- Minimum 4 years of experience defining and building detection and response programs in highly regulated industries (ie. Healthcare, Finance)
- Minimum 3 years of experience in incident response including host and cloud forensics, incident management, threat intelligence, threat hunting, and/or security detection – ideally at a fast growing startup
- Ability to analyze attacker tactics, techniques and procedures (TTPs) from security events across a large heterogeneous network of security devices and end-user systems
- Experience deploying, configuring, and administering advanced technologies like SIEM, SOAR or UEBA
- Experience with scripting languages (e.g., Python, Java, shell scripting)
- Knowledge in cloud-based services and infrastructure (AWS, Okta, Google

Ask for Help

- Ability to collaborate with cross-functional partner teams, such as Legal, Communications, and Engineering for efficient, large-scale response

Nice to Haves

- Possess or could obtain one of the following certifications: CISSP, GCED, GCIH, GCFA, CISA, CEH, etc.
- Experience deriving Security Operations Metrics (MTTD/MTTR)
- Experience using MITRE ATT&CK framework for incident simulations, and tabletop exercises
- Experience with AWS, Datadog, Panther, Crowdstrike, etc.

Ramp Benefits (for U.S. based employees)

- 100% medical, dental & vision insurance coverage for you
 - Partially covered for your dependents
 - OneMedical annual membership
- 401k (including employer match)
- Unlimited PTO
- Annual education reimbursement
- WFH stipend to support your home office needs
- Monthly wellness stipend; Headspace annual membership
- Parental Leave
- Relocation support
